

About the journal “Living Heritage”

The journal “Living Heritage” aims at offering new quality texts and themes which have not been sufficiently discussed, or have not been treated at all in the languages of the peoples in the Balkans, to broad scientific public and those who are interested in philosophy and gnosis. These themes are primarily related to the Islamic philosophy (which is nowadays recognized as a combination of philosophy and gnosis, theosophy or transcendent divine wisdom), gnosis (*irfan/tasawwuf*) and religious philosophy.

Led by the idea that the real cognition is not limited by time and space, that it not subject to the flow of time and that, as such, it belongs to the whole mankind, the main goal of starting the journal is to keep alive and present the most sublime intellectual and spiritual achievements from the Islamic intellectuals heritage and enriching that heritage, as it is reflected in the title as well.

About the publisher

The Heritage of Spirituality

The Foundation “The Heritage of Spirituality” was established by a number of people gathered around the idea of preserving and promoting the cultural heritage of Bosniaks, primarily its spiritual component. One of the fundamental aims of the publishing activity of the Foundation “The Heritage of Spirituality” is to promote the universal values arising from the divine Revelation and the intellectual achievements of man within its light as a response to its timeless call. One of the characteristics of the Foundation’s activities is the fact that, through its publishing, it offers the fruits of the Islamic genius which, in the light of Islam, develops rational and spiritual thinking, i.e. what is recognized as philosophy, theosophy and gnosis.
